## Bubbles graph

Legend

The Zoom button allows to enlarge the size of the bubbles for a better visibility

Color referent. Level that determines the color of the S.W.O.T. bubbles (Strength, Weakness, Opportunity, Threat).

Filter

Series or placement  
 8,48 — X-axis value  
 -2,5 — Y-axis value  
 2,95 — size of the bubble

The red cross illustrates the color reference: it is positioned on the highest geographical level selected.

In the example: France is selected and is the highest geographical level in the database.

When a bubble is selected, a pin is displayed in its center (1), the wording of the bubble is selected in the selector (2) and the information about it is displayed (3).
